Padma Shri
Dr. Satish Kumar

International Women's Day

International Women's Day is a global day celebrating the social, economic, cultural and political achievements of women.

"The story of women's struggle for equality belongs to no single feminist nor to any one organization but to the collective efforts of all who care about human rights," says world-renowned feminist, journalist and social and political activist Gloria Steinem. Thus International Women's Day is all about unity, celebration, reflection, advocacy and action - whatever that looks like globally at a local level. But one thing is for sure, International Women's Day has been occurring for well over a century - and continues to grow from strength to strength.
