Gender Equality and Social Inclusion: Challenges and Road

Introduction

UNICEF has defined gender equality as “means that women and men, and girls and boys, enjoy the same rights, resources, opportunities and protections. It does not require that girls and boys, or women and men, be the same, or that they be treated exactly alike.” The idea is gender equality is an active movement that aims at bringing about women empowerment and social inclusion.

Gender equality can be achieved only when women and men enjoy the same rights and opportunities across all sectors of society, including economic participation and decision making, and when the different behaviours, aspirations and needs of women and men are equally valued and favoured. Keeping this in focus the Department of Humanities and Social Sciences proposes to create awareness regarding gender equality and social inclusion by organising a seminar on “Gender Equality and Social Inclusion: Challenges and Road Ahead.”
