

Google OAuth settings for Remotlog

=====

Steps to follow to create OAuth client ID information in Google admin console account

- 1) Visit <https://console.developers.google.com/apis> and login with your Google admin account only
- 2) Select "Credentials" from left side menu
- 3) Click on "Create Credentials" on top menu and select "OAuth Client ID" from drop list
- 4) Select Application Type as 'Web application' and Give a name as **Remotlog**
- 5) In Authorized JavaScript origins, add URI as <https://nitk.remotlog.com>
- 6) In Authorized redirect URIs, add URL as <https://nitk.remotlog.com/ras-auth/google-redirect/5f5b094cd49e8096e8234213>
- 7) On the same screen, top right you can see Client ID and Client Secret values. Please share the same to us.
