

# Scholarship for students of National Institute of Technology, Kurukshetra

## What is the Bolt IoT scholarship program?

- As part of this program, the qualifying students of National Institute of Technology, Kurukshetra can **join the Bolt IoT and ML online video training for FREE**. They only have to purchase the hardware kit worth Rs.2,750/- required to build various hands-on projects as part of the training. Students have to visit <https://info.bolttiot.com/iotmlscholarship> to answer the scholarship test.
- Since MHRD and AICTE policy has made it compulsory for engineering students to undergo internship or training, this training offers them the necessary certificate.

## What are some of the activities that students will perform as part of this IoT & ML training?

- Learn concepts of IoT and ML from basics
- Learn programming languages like Python, HTML and Javascript
- During the training, we will be available to solve any of your doubts or queries.
- Students will build 14 different hands-on projects such as Home Automation, Smart Farming, Industrial Temperature Monitoring with Predictive Maintenance etc.

## Why should the students avail this scholarship on IoT and ML training?

- This four weeks of **online** video training is **excellent for those who want to start with IoT and ML** because it teaches them to build projects from the basics.
- **Certificate:** Upon completion of the training which can be submitted as part of AICTE rules as well as during the job application process.
- **Online training:** Since this training is being conducted online, it ensures suitable safety for the students.
- **Better job opportunities:**

- IoT and ML are in-demand technologies, so hands-on knowledge of these will increase the student's chance of getting a better job offer by manifold.
- The number of engineering students is growing year on year, and comparatively, there are fewer job vacancies. This situation has been made worse with the Coronavirus outbreak. Hiring companies look for engineering students who have to build hands-on projects beyond their college curriculum during the selection process as these students already have the required knowledge. As part of this training, students will build such hands-on projects, and it will help them stand out from the competition.

## **Other critical points:**

- **The option of full refund:** In case the students are not happy with the hardware or the training offered to them, then they can return it and get full refund as per the refund policy. This ensures that there is no risk for students or the faculty involved in the process.
- **Lifetime access:** Students can register now and start the training after the exams or at any other time.

## **How to avail the scholarship?**

- To avail the scholarship, the students have to answer a scholarship test and qualify for the same by scoring at-least 70% marks.
- This is a short test and will not take more than 10 minutes of the students. This ensures that they can answer it without spending much time if they have exams ongoing.
- To answer the scholarship test, students have to visit <https://info.bolttiot.com/iotmlscholarship>

## **Terms and conditions**

- This invitation is only valid for students of National Institute of Technology, Kurukshetra and cannot be shared with students of any other institute.
- The **last date to avail the scholarship is Tuesday, 28th of July 2020.** Keeping this in mind, please inform your students about the scholarship at the earliest.
