

Sponsored Research and Development

NIT Kurukshetra, an Institution of National Importance has made steady progress in the field of research, development, consultancy and testing. Apart from teaching, faculty members are involved extensively in research and consultancy activities contributing significantly to the development of knowledge and technology.

At present, 211 part-time and 13 full-time research scholars are registered for their Ph. D. programme in different departments of the Institute. Research papers have been published by our faculty members and research scholars in journals of international and national repute. Faculty members have presented their research papers in various conferences, seminars, and symposia held at national and international level. Consultancy work undertaken by faculty is remarkable both in terms of revenue and research contents. This activity includes project design, testing, evaluation and certification. Specialized training programmes are also conducted from time to time as per the need of the organizations. A few patents have also been granted to some of our faculty members. Our faculty members have been conferred upon a large number of awards and prizes for their contribution in the innovative development of science and technology.

Institute has signed MoUs with foreign universities to promote collaborative research and consultancies. These include MoUs between NIT Kurukshetra and RESEAU "N+i" Engineering Institutes, France, The University of Toledo, College of Engineering, U.S.A., Concordia University, Montreal Canada, and Binghamton University, New York.

Our faculty members have been granted major sponsored research projects from different funding agencies including DST, DIT, CSIR, AICTE, DRDO and UGC.
